SUMMARY

I design products that improve operations. Turning ideals into impact, and broken workflows into business results. Five years working across B2B tools, field apps, and operational SaaS as the designer closest to the user, embedded in multidisciplinary teams.

EXPERIENCE

Product Designer · Thermondo 2022 – 2026

- Reduced scheduling errors and improved scalability by redesigning the dispatch system for a growing product portfolio.
- Increased First-Time Resolution and field transparency through a mobile app for technicians.
- Streamlined construction planning by transforming unstructured data into structured, actionable inputs.
- Designed customer-facing communication flows to improve clarity, reduce confusion, and align expectations across service touch points.

UX Designer · Golda Studio 2021 – 2022

Delivered high-impact design solutions for enterprise clients by aligning stakeholders, creating interactive prototypes, and iterating based on feedback.

UX Designer · Yalmo (Autisleep) 2021 – 2022

Took a hackathon concept from 1st-place winner to a seed-funded startup. Designed the full product experience for a sleep and behaviour monitoring platform for families of autistic children.

UX Designer · VIA 2019

Improved driver-side UX through fast iteration and close collaboration with developers, enhancing usability and alignment with product goals.

SKILLS

- UX Research & Design Thinking
- Rapid Prototyping & Iteration
- Mobile & System Design
- AI-assisted design & prototyping
- Usability Testing
- HTML, CSS, JavaScript (basic)
- Cross-functional Collaboration
